LISTING OF CLAIMS

1-13. (Canceled)

14. (Currently Amended) Apparatus for transferring flowable particulate material from one station to another, comprising:

(i) a carrier for the material, and

(ii) means externally of the carrier for moving the carrier between said stations,

(iii) a tube,

(iv) the carrier being mounted in said tube externally of which said moving means is mounted,

(v) the arrangement being such that the carrier and the means are not being connected mechanically for movement of the carrier, the carrier comprising magnetic properties and said external movement means comprising a magnet and magnet moving means, and

(vi) further including sensors disposed about said tube for determining the position of the carrier therein.

15. (Canceled)

16. (Canceled)

17. (Currently Amended) Apparatus according to claim 14-16, wherein the tube housing providing provides a guide for guiding the travel of the carrier.

18. (Currently Amended) Apparatus according to claim 14-16, the housing providing wherein the tube provides a guide for guiding travel of the movement means.
